AI 洞察

用户解读: Improve adhesive quality to ensure reliable sticking on various surfaces, especially vertical ones like walls and fridges; reduce adhesive coverage to prevent curling; eliminate cardboard fillers in packaging to accurately reflect product quantity; update calendar dates to current year; enhance paper durability to prevent peeling and tearing during use; consider redesigning the tray for better fit with standard sticky note sizes; address chemical odor concerns reported by users; improve overall product consistency across batches to meet expectations of organization-focused users.

产品解析: Improve adhesive reliability by reformulating the glue to ensure long-term sticking on various surfaces; eliminate cardboard fillers to match packaging visuals with actual content; update the included calendar to the current year; redesign the adhesive application to avoid overhang that causes curling; reduce or eliminate chemical odor through better materials or manufacturing processes; offer transparent packaging or a 'fill level' indicator to manage customer expectations; consider offering a smaller, more compact version for standard note pads to improve fit and usability.

Missing Pieces VP

Sticky notes were good however, my package came in with half of them missing.

便利贴很好，但是，我的包裹到了，其中一半丢失了。

Not sticky and outdated calendar VP

Not sticky at all, dried up. Also, the calendars were outdated, years 2021/2022. Very disappointed. Bought 2 for holiday gifts and the 2 recipients were too kind to tell me they didn't stick. The return window has closed.

Calendar is 2019 & 2020 VP

The sticky part of the post-its seem old as the notes stick to each other and rip when trying to pull them apart. Also the calendar included is for 2019 and 2020. Very disappointed as I purchased this the end of September, had Iknown that I wouldn't have purchased.
